APPLICATION FOR OSHPD SPECIAL SEISMIC  
CERTIFICATION PREAPPROVAL (OSP)

OFFICE USE ONLY

APPLICATION #: OSP – 0603

OSHPD Special Seismic Certification Preapproval (OSP)

Type: ☒ New ☐ Renewal

Manufacturer Information

Manufacturer: Danfoss

Manufacturer's Technical Representative: Tabrez Mahamad

Mailing Address: 8800 W. Bradley Road, Milwaukee, WI. 53224

Telephone: (888) 326-3677

Email: [tabrez.mahamad@danfoss.com](mailto:tabrez.mahamad@danfoss.com)

Product Information

Product Name: VL T NEMA 3R Panels

Product Type: Variable Frequency Drives

Product Model Number: See Attachment 1

(List all unique product identification numbers and/or part numbers)

General Description: Drive for variable speed control of 3 phase induction motor with or without bypass backup.  
Seismic enhancements incorporated into the test units and modifications required to address anomalies observed  
during testing shall be incorporated into the certified units.

Mounting Description: Rigid wall mount or flexible wall mount.

Applicant Information

Applicant Company Name: EASE

Contact Person: Jonathan Roberson, S.E.

Mailing Address: 5877 Pine Ave, Suite 210, Chino Hills, CA. 91709

Telephone: (909) 606-7622

Email: [j.roberson@easeco.com](mailto:j.roberson@easeco.com)

I hereby agree to reimburse the Office of Statewide Health Planning and Development review fees in accordance with the California Administrative Code, 2016.

Signature of Applicant: 

Date: April 22, 2019

Title: Principal Structural Engineer

Company Name: EASE

"Access to Safe, Quality Healthcare Environments that Meet California's Diverse and Dynamic Needs"

OFFICE OF STATEWIDE HEALTH PLANNING AND DEVELOPMENT  
FACILITIES DEVELOPMENT DIVISION

California Licensed Structural Engineer Responsible for the Engineering and Test Report(s)

Company Name: EASE

Name: Jonathan Roberson, S.E. California License Number: S4197

Mailing Address: 5877 Pine Ave, Suite 210, Chino Hills, CA. 91709

Telephone: (909) 606-7622 Email: [j.roberson@easeco.com](mailto:j.roberson@easeco.com)

Supports and Attachments Preapproval

- ☐ Supports and attachments are preapproved under OPM-  
(Separate application for OSHPD Preapproval of Manufacturer's Certification (OPM) of Supports and attachments is required)
- ☒ Supports and attachments are not preapproved

Certification Method

- ☒ Testing in accordance with: ☒ ICC-ES AC156
- ☐ Other (Please Specify): \_\_\_\_\_

Testing Laboratory

Company Name: Environmental Testing Laboratory, Inc.

Contact Name: Brady Richard

Mailing Address: 11034 Indian Trail, Dallas, TX. 75229-3513

Telephone: (972) 247-9657 Email: [brady@etldallas.com](mailto:brady@etldallas.com)

# OFFICE OF STATEWIDE HEALTH PLANNING AND DEVELOPMENT FACILITIES DEVELOPMENT DIVISION

## Seismic Parameters

Design in accordance with ASCE 7-10 Chapter 13: ☒ Yes ☐ No

Design Basis of Equipment or Components ( $F_p/W_p$ ) = 1.87 (Rigid Wall) / 4.68 (Flexible Wall)

$S_{DS}$  (Design spectral response acceleration at short period, g) = 2.60

$a_p$  (In-structure equipment or component amplification factor) = 1 (Rigid Wall) / 2½ (Flexible Wall)

$R_p$  (Equipment or component response modification factor) = 2½ (Rigid Wall) / 2½ (Flexible Wall)

$\Omega_0$  (System overstrength factor) = 2

$I_p$  (Importance factor) = 1.5

$z/h$  (Height factor ratio) = 1

Equipment or Component Natural Frequencies (Hz) = See Attachment 2

Overall dimensions and weight (or range thereof) = See Attachment 1

Equipment or Components @ grade designed in accordance with ASCE 7-10 Chapter 15: ☐ Yes ☒ No

Design Basis of Equipment or Components ( $V/W$ ) = \_\_\_\_\_

$S_{DS}$  (Design spectral response acceleration at short period, g) = \_\_\_\_\_

$S_{D1}$  (Design spectral response acceleration at 1 second period, g) = \_\_\_\_\_

$R$  (Response modification coefficient) = \_\_\_\_\_

$\Omega_0$  (System overstrength factor) = \_\_\_\_\_

$C_d$  (Deflection amplification factor) = \_\_\_\_\_

$I_p$  (Importance factor) = 1.5

Height to Center of Gravity above base = \_\_\_\_\_

Equipment or Component Natural Frequencies (Hz) = \_\_\_\_\_

Overall dimensions and weight (or range thereof) = \_\_\_\_\_

Tank(s) designed in accordance with ASME BPVC, 2015: ☐ Yes ☒ No

## List of Attachments Supporting Special Seismic Certification

☒ Test Report(s) ☐ Drawings ☐ Calculations ☐ Manufacturer's Catalog

☒ Other(s) (Please Specify): Attachments 1 & 2

## OSHPD Approval (For Office Use Only) – Approval Expires on January 10, 2028

Signature: \_\_\_\_\_

Date: January 10, 2022

Print Name: Timothy J. Piland

Title: SSE

Special Seismic Certification Valid Up to:  $S_{DS}$  (g) = 2.60

$z/h$  = 1

Condition of Approval (if applicable): \_\_\_\_\_

| Mounting                      | WALL (RIGID or FLEXIBLE): component is rigidly mounted to the surface of a wall or other vertical support. Support structure may be rigid or flexible.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |      |      |                                            |          |                                    |                   |                                                |                                                                                          |
| Notes                         | <div>1. Basis:<ul style="list-style-type: none"><li>UUT#: Indicates a unit matching these characteristics was tested.</li><li>INT (Interpolate or Extrapolate): indicates a configuration not specifically tested, and by which seismic qualification is established through evaluation of testing of similar units in the product line.</li></ul></div> <div>2. Type Code defines the configuration of the panel. Each alphanumeric character defines a configurable option in the panel. For a complete listing of the Type Code characters recognized and accepted by this OSP, see Figure 1. For cases in which the Type Code character does not uniquely identify the corresponding subcomponent, the variations accepted by this OSP are listed in Table 2.</div> <div>3. All units tested included enhancements to standard manufactured products to improve seismic performance. Danfoss states all modifications became part of all standard manufactured products produced after March 31, 2020.</div> <div>4. B1 Drive Frames in Panel Size 1 are limited to non-bypass without options or bypass without options.</div> <div>5. Differences in function between each drive category are accomplished through software/programming specific to each.</div> |      |      |                                            |          |                                    |                   |                                                |                                                                                          |
